

STUDENT ASSISTANT

ANALYTICS AND VISUALIZATION

Do you consider yourself ambitious? And can you picture yourself in a student job within Advanced Analytics? You now have the opportunity to become one of our new student assistants at KMD.

ABOUT KMD

KMD is Denmark's biggest and most serious playground for IT talents. We are more than 1.000 IT specialists who work with Java, Microsoft, Mainframe, SAP, architecture, testing and project management.

At KMD, we do not care where you get your great ideas as long as you share them with us. Are you ready to log on to your life's strongest network?

Visit KMD.dk to read more about how we can satisfy your ambitions for a career in the IT industry.

We are hiring student assistants with ability to challenge boundaries who can use advanced analytics technologies and visualization techniques to prevent fraud, identify exposed groups and risk management etc. We hire candidates to our departments in Ballerup, Odense, Aarhus and Aalborg.

We imagine you being at the end of your Bachelor degree or at the beginning of your Master degree. You have technical flair and strong analytical skills. Furthermore, you are interested in working with Business Intelligence, Analytics and Visualization, at which you possess excellent competencies. You must demonstrate business understanding with respect to the tasks you will be given.

As a person, you are expected to be; independent, proactive and a team player. In addition, we expect that you are innovative and able to take responsibility and ownership.

YOUR OPPORTUNITIES

As a student assistant at KMD, you will be working with tasks associated with the problems our customers face. For example, these problems could be; migration pattern analysis, risk analysis in relation to a company's customers or structured social analyses. Your work will involve customer and development projects, in which we explore new technology and new methods.

As a student assistant at KMD, you will be part of a strong student network, which includes participating in various events several times a year. As part of this network, you will have plenty of opportunities to build strong connections to other student assistants throughout the entire organization.

You will averagely be working 15 hours per week and flexibility is given in exam periods.

As a student assistant at KMD, you will get solid and valuable experience before your studies are complete, and be one-step ahead regarding possible job opportunities and graduate programs at KMD.

If you have further questions about the student job, you are welcome to contact Lead Business Development Manager, Michael Israelson, by calling +45 9135 5631 or by sending an email to MII@kmd.dk.

If you are KMD's next student assistant, send your CV to: WAJ@kmd.dk
